## INTRODUCTION

Dear Friend,

My name is Mohamed Tohami and I would like to congratulate you for your DESIRE to create everlasting success.

Six years ago I was just an average person, living with no passion, aim or purpose.

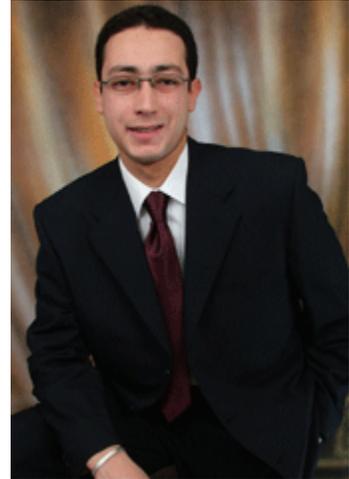

I bet this sounds familiar...

When I was 17 years old, I started searching for what I really wanted to do with my life.

I didn't want to live an ordinary life, go to college, get a boring dead-end job, get married and keep working...at that boring dead-end job... just to pay the bills and barely support my family.

NO! I wanted more out of life!

Don't get me wrong...there's nothing wrong with going to college, getting a good job and getting married. But, I wanted to give my family

**TOHAMI's SUCCESS SECRETS**  
***6 Surefire Secrets to Create Everlasting Success***

everything they deserved...all the wonderful things life has to offer AND I wanted to be fulfilled while I was doing it!

I wanted to live my dream, enjoy what I was doing with my life and make enough money to LIVE...not get by, but LIVE!

Most importantly, friend, I wanted to find ways that I could serve others and ...make a difference!

So...I started reading as many books as I could get my hands on....books about success and personal development. And...I attended as many courses and seminars as I possibly could.

I believed so much in the power of human potential and what a person can achieve if he has a dream and a clear purpose in life.

One day, after 6 years of searching, I discovered the giant inside me!

At last... I found a meaning for my life. And, I found a way to give a maximum contribution to other people's lives.

Since that moment, I started doing things I would never have been able to do before!

I worked so hard, I tried everything I read and did all what I could do to achieve massive success. And here is the result...

***6 Surefire Secrets to Create Everlasting Success***

Secret #1:

**THINK LIKE A MILLIONAIRE**

Is your mind ready for massive success?!!

Let me explain...

As you may already know, the way you think affects your emotions and actions.

In order to reach higher level of success your mind must be able to think the way successful people do.

I bet you can't tell me, for example, that...

...Successful people think that they are victims to external circumstances.

Or that successful people have negative attitude and are always complaining.

Or that successful people surround themselves by negative people most of the time.

**TOHAMI's SUCCESS SECRETS**  
***6 Surefire Secrets to Create Everlasting Success***

Or that successful people act based on fear like someone who is struggling to find a cave that would keep out the saber-toothed tigers.

Or that successful people think like the old-school mentality that says, "If you want financial security then you have to go to college, get a degree, and get a stable job"

Or that successful people trade their time for money and have another person be in control of their freedom as well as the amount of money that they could make.

...and so on.

To be highly successful you must start thinking like successful people do. You must start thinking like a MILLIONAIRE!

Here are 3 powerful tips to help you start thinking like a millionaire:

1. Take 100% Responsibility

What is stopping you from achieving massive success?!!

Can I make a guess?!!...

...Ok, thank you.

**TOHAMI's SUCCESS SECRETS**  
***6 Surefire Secrets to Create Everlasting Success***

I guess that you are doing one of two things. Or you may even be doing both.

\*\*\* You are either blaming or justifying.

Let me explain...

You either blame others for your own mistakes or you blame yourself.

Or you do something else more dangerous...

You come up with reasons to explain why things are the way they are.

Something like:

"I'm too young"

"I'm too old"

"I don't have enough money"

"I don't have enough knowledge"

"I don't have enough experience"

"That's the way it is"

Did I make the right guess?!!

If yes then let me ask you this question:

**TOHAMI's SUCCESS SECRETS**  
***6 Surefire Secrets to Create Everlasting Success***

\*\*\* Will anything improve if all you do is 'justifying' or 'blaming'?

I think you will agree with me if I told you that the answer is:

NO WAY.

Whether or not your life is that way because of you or other external circumstances...

\*\*\*...The only way for your life to get better is to accept and take the position that YOU'RE RESPONSIBLE FOR YOUR LIFE.

I know you may have problems because of your parents, the way you were brought up or the environment you're living in. Or you may have problems due to other reasons. But will blaming or justifying such things ever change your life?

Absolutely NOT.

The only way for your life to change is to be responsible for any change you want.

This may seem like easy to be said than done. But let me ask you...

Do you know any other solution?!

Can anyone improve and change your life but YOU?

**TOHAMI's SUCCESS SECRETS**  
***6 Surefire Secrets to Create Everlasting Success***

Change the environment or change yourself, whatever you decide to do, but don't blame people or justify your situation.

You are either the effect of your environment or you've an effect upon it. Take charge of your life and be responsible.

Your success is between your ears -- your mind is what I mean ☺ --.

Whatever your situation is and environment you are in, no body can change your life except YOU.

Don't expect that someone will come and tell you, "Could you please let me change your life for the better and make you the most successful person in the world."

THIS WILL NEVER HAPPEN.

And even if it happened, you will fail as soon as this ANGEL leaves you. That is simply because you didn't do it yourself. You didn't learn how to become successful.

So, the only way to change and build a successful life is to take 100% responsibility for each and everything that is happening in your life. Be in charge of your life.

YOU ARE THE ONLY ONE WHO CAN MAKE IT HAPPENS.

**TOHAMI's SUCCESS SECRETS**  
***6 Surefire Secrets to Create Everlasting Success***

2. Master Your Attitude

The only thing that distinguishes rich people is that they follow the ultimate success principle that states: "You become what you think about most of the time".

They get to know that their life is shaped based upon what they dwell upon most of the time. They know that they will become poorer if they always think that they are poor, they have no control over their life, they lack money, they don't have enough knowledge ...etc

And so they choose what to think about carefully. Instead of thinking of what they don't want, they start thinking of what they want. They learn the common rules and principles of success and apply them to get what they want.

If you draw your attention to what you want, you will see opportunities all over the place. Then you can use these opportunities to acquire and earn the things you desire.

If you want to become rich, think rich and act rich.

Here is the secret of becoming rich and successful: "You become what you think of most of the time".

**TOHAMI's SUCCESS SECRETS**  
***6 Surefire Secrets to Create Everlasting Success***

The way you think highly affects the way you act. To act powerfully, you must think powerfully. You must control your thoughts.

There is a study that shows that 85% of our self talks are negative.

Don't ever think that you are going to be successful, if you have a rate that is close to that one.

You must choose your thoughts carefully.

The best technique I know that can help you master your attitude is to  
ASK THE RIGHT QUESTION.

The right question directs your mind to think of the right answer.

For example, instead of asking yourself, "Why is this happening to me?", ask yourself, "How can I benefit from this opportunity?" or "What lesson can I learn from this challenge?"

Asking the right question will open the door to developing a laser-focused, positive, powerful mindset.

Choose your thoughts carefully, and use the power of questions to master your attitude.

**TOHAMI's SUCCESS SECRETS**  
***6 Surefire Secrets to Create Everlasting Success***

3. Search for Mentors and Build Strong Networks

Learn from successful people around you. Study their life carefully. See how they act and learn how they think. Search for mentors who can help you get yourself on the right track.

One advice from a successful person can change your life forever.

I have lots of mentors in my life. Everyone taught me something that was a turning point in my life.

I can't stress enough on the benefits of having mentors.

In short I would say that mentors help you shorten the learning curve, take giant steps forward and step above the average.

Also, you need a powerful network of honest friends and significant figures around you to help and give you support and honest advice whenever you need it.

Start now looking for important people in your life and think of ways to increase your relationship with them. Think win-win.

Follow the MASTER MIND principle. Build a team around you with the same purpose as yours. Meet your team regularly to share ideas, support each other, and hold each other accountable.

**TOHAMI's SUCCESS SECRETS**  
***6 Surefire Secrets to Create Everlasting Success***

Surround yourself by positive, successful people and honest friends.

Search for mentors and learn from successful people as much as you can.

The truth might hurt, but you can't become successful unless you think the right way.

Follow the above tips and start thinking like a millionaire NOW!

Don't wait for the perfect time because it will never happen.

Be responsible.

Master your attitude.

## Secret #2

### ORGANIZE YOUR PRIORITIES

What are priorities? These are the things of utmost importance. Time management is basically priority management. It is the act of determining what is important and then living out your life or work in a manner that will help you fulfill your priorities.

One of the biggest differences between rich and poor people is how they choose their priorities and how they organize their time around them.

I bet that you know that and you've tried many times to live up to your priorities. But it seems like there is something that always gets you off track and that you always lose your focus and get distracted easily.

Don't worry you're not alone. Time Management is the most popular, worldwide problem in history.

But this doesn't mean that you won't be able to solve it.

Here's why...

Now, I will give you the cause of all your time management problems so that you can avoid it immediately and gain full control over your time.

**TOHAMI's SUCCESS SECRETS**  
***6 Surefire Secrets to Create Everlasting Success***

Time Management will not be a problem anymore.

Let me ask you first...

What are your priorities and values?

Strange or difficult question right?!!!

But try to answer it.

Without knowing your priorities and values you will always fail to utilize your time the best way possible.

So, you are saying, "Then this is the cause you are talking about Tohami?"

Absolutely not.

Of course knowing your values and priorities and organizing your time around them is the core of time management. And I believe that big portion of people is doing or trying to do that. They have sense of prioritization and they know what is important for them.

But I'm after something deeper.

**TOHAMI's SUCCESS SECRETS**  
***6 Surefire Secrets to Create Everlasting Success***

"What is the cause of all time management problems then?!!!", you say.

Ok, I'll jump into the cause immediately...

Get ready to know and eliminate the single cause of all your time management problems forever.

Here it is...

\*\*\* YOU ARE MISSING THE "WHY?"

Read it again.

You are missing the "WHY?"

The reason, the meaning and the purpose of your priorities and values.

Why did you choose these priorities and values in the first place?

Why are they important to you?

What gets us off track easily is that we are not committed or attached to our priorities and values because we don't have a clear reason or meaning for them.

What is your life all about?

**TOHAMI's SUCCESS SECRETS**  
***6 Surefire Secrets to Create Everlasting Success***

What is the single driving force behind all you do?

What is your soul going after?

What is your LIFE PURPOSE?

Knowing your life purpose will help you choose the right priorities that really matter to you; that will help you live with passion not only everyday but every moment.

Knowing your life purpose will help you choose your values carefully; the values that reflect who you truly are.

Knowing your life purpose will prevent the "winds" of the 'urgent' or 'more fun' to blow you off course and prevent you from accomplishing your established priorities.

Set the sail first and then start sailing.

Knowing the purpose of your life is the first step, and then comes your priorities.

This way when you set your priorities you will rarely get off track because you have strong compelling reasons behind what you are doing.

**TOHAMI's SUCCESS SECRETS**  
***6 Surefire Secrets to Create Everlasting Success***

You will have a strong motivation that empowers you to act on every task until you get it done.

You will not only do things right, you will also do THE right things.

Knowing your priorities and backing it up with your purpose in life form a combination that can't be beaten and give you full control over your time.

I used to try every single time management technique without success until I discovered my purpose in life. That moment everything just fitted in place.

This motivated me to share with others how I discovered my life purpose and how they can align everything they do in life to fulfill and live that purpose.

## Secret #3

### HAVE A PURPOSE

Take Care!!

This could be the only problem that stops you from attracting success to your life.

Let me make one thing very clear: "If you don't know where you want to go in your life, you will never be able to get there".

If you move through your life without knowing where you are and where you want to go, you will get lost. You may end up at a place where the only feelings you have are disappointment, depression, and regret.

If you are not clear about what you want, then you are sabotaging your own future.

You must jump out of your comfort zone and chart a new course of action in which you are very clear about where you are and where you want to go.

**TOHAMI's SUCCESS SECRETS**  
***6 Surefire Secrets to Create Everlasting Success***

Don't say wishy-washy statements. You must be very specific about what you want, because you can't get to a place without knowing its details.

Here are some questions to help you define what you want:

- What do you want to do?
- What do you want to have?
- Who do you want to be?
- Where do you want to go?
- How do you want to spend your time?
- What do you want to learn?
- Who do you want to meet?
- Who do you want to marry?
- How much money do you want to earn, save, and invest?
- What will you do for your health?
- What contribution do you want to make?

When you answer these questions, you will have a clear picture of your life. And when you know what you want, you must ask for it. Then, start taking advantage of genuine opportunities that walk in your future door.

My friend, it's time to start building your better life.

## Secret #4

### ACT BOLDLY

Taking strong, powerful actions is the key to achieve massive success in your life. You need to take action on your dreams and beliefs every day.

You don't only need to take actions; you also need to take BOLD actions. And to take bold actions you must unleash the power of PERSISTENCE, DECISIVENESS and PATIENCE.

#### 1. The Power of Persistence

What is holding most of people from succeeding in life is that they don't have enough persistence.

Bottom line: persistence is the most important factor in achieving lasting success in your life. You will never be able to succeed without being persistent.

So, this goes without saying, no success can ever be achieved without 100% persistence. However, 100% persistence is not enough. It is essential but not enough.

**TOHAMI's SUCCESS SECRETS**  
***6 Surefire Secrets to Create Everlasting Success***

What if you are persistent, but you are far beyond getting what you want out of life?

What do you think you are still missing?

If you are persistent but can't achieve success in life, then here is the reason:

“Persistence will not work if you are not doing the right thing”

Persistence takes a lot of energy but you can easily keep yourself motivated toward your goals if they are the right goals for you.

If you are going after your dreams and doing what you love to do, then you can easily be persistent and motivated. But if what you are trying to achieve doesn't match with your talents and passion, you will find it difficult to maintain the same level of motivation and persistence.

Super-smart people and students of success first discover their purpose in life. They know what they love and design their life based upon it. They know that they came to life for a certain reason. They know that energy flows in the path of least resistance, so they choose the path of their purpose and passion.

Smart people choose their right path then persist until they get where they want to go.

**TOHAMI's SUCCESS SECRETS**  
***6 Surefire Secrets to Create Everlasting Success***

If you follow a path that sucks your energy and turns you off, you will suffer a lot without being satisfied.

So, to get yourself on the right track to success, you must discover why you are here in life. What is your life purpose? What do you love to do? How do you want to be remembered?

It doesn't take too much effort to discover your life purpose. You may just need to ask yourself persistently: "why am I here?"

And even if it takes too much time and effort to discover your purpose in life, the result will be very rewarding.

Living a purposeful life is the only path to true success and satisfaction. Imagine what it would be like if:

- You live with passion.
- You have a meaning for your life and work.
- You make a difference in the world.
- You excel at what you do.
- You do what you love and love what you do.

My friend, purposeful living is the secret ingredient to lasting success.

**TOHAMI's SUCCESS SECRETS**  
***6 Surefire Secrets to Create Everlasting Success***

Knowing your purpose will help you take massive, bold actions that can take you to where you want to go whatever it takes to get there.

Your life purpose will provide you with the ultimate power of persistence.

I urge you to start fetching your life purpose. And when you find it you will get to know the real giant within you.

Go get your Life Purpose Discovery System now:

<http://www.7stepstoliveonpurpose.com>

## 2. The Power of Decisiveness

Here comes one of the biggest obstacles that are holding you back from success.

If you are not successful as you want to be then here is the reason:

“You didn't decide to become successful yet”.

Making a decision is the critical step that must be taken before achieving anything in life. So, if you are not living a successful life till now then that is because you didn't decide to become successful yet.

**TOHAMI's SUCCESS SECRETS**  
***6 Surefire Secrets to Create Everlasting Success***

If you are still blaming circumstances and making excuses, then you are either afraid of change or you don't know what you want.

Indecisiveness is one of the biggest obstacles that is holding you back from success.

You will remain as you are now until you know exactly what you want and then make an unequivocal decision that you are going to get it.

Decide that you are going to rise to the top of your field. Study success and apply the tested and proven strategies for getting what you want. Develop success habits through practice and repetition until they become as natural to you as breathing in and breathing out.

When you are clear about what you want and take the decision to get it, the payoff for you will be tremendous.

Resolve today that you are going to become successful and do whatever it takes to get what you want.

### 3. The Power of Patience

Can't you wait to get what you want? Do you lose your patience when something takes time to be completed?

**TOHAMI's SUCCESS SECRETS**  
***6 Surefire Secrets to Create Everlasting Success***

How do you react when you don't see immediate gain or gratification from your efforts? Do you persist or loose hope?

When you face hard times and the road to your dreams looks too long, you must not loose hope. This is how life works. Everything is achieved step by step.

But how can you trust that you will get what you want if you persist and be patient?!!

The answer to this question is found in nature!!

Nature teaches us one of the greatest success principles ever known in history.

This principle states that: "You reap what you sow"

If you put an apple seed into the ground, you will always get an apple tree. Similarly, if you sow positive thoughts you will reap positive actions. And if you sow positive actions you will reap positive results.

If you spend a lot of efforts trying to achieve something and you didn't get the expected results, then the only reason for that is that you sowed the wrong seeds.

**TOHAMI's SUCCESS SECRETS**  
***6 Surefire Secrets to Create Everlasting Success***

That is one of the benefits of failure. It makes you aware of your wrong seeds so that you can get rid of them and sow new ones.

Another lesson you can learn from this principle is that everything takes time to grow and mature. Nothing happens between day and night. Your seeds need time to grow and turn into fruits.

If you dig into the ground to find out why you aren't getting fruits then you will destroy the whole process.

Don't rush out. Everything takes time. Just make sure that you sowed the right seeds.

Your best seed is the positive attitude. If you sow positive attitude you will reap a tremendous harvest.

Everything you do will amount to something. Every action is a seed which corresponds to a certain result.

Be careful of what you are sowing of your time, money and energy. Everything does matter.

Sow good seeds for your dreams now and trust that some time in the future you will reap the rewards of your efforts.

And always ACT BOLDLY.

**TOHAMI's SUCCESS SECRETS**  
***6 Surefire Secrets to Create Everlasting Success***

Small things accumulate to form long-term success. This is what successful people do and this how success stories are built; step-by-step. Short term accomplishments result in long term achievements.

Little things make a difference.

Reading 10 pages everyday will result in finishing 300-pages-book a month and 12 books a year.

Writing 1/3 page everyday will result in writing 360-pages-book in 3 years. And who knows, you can become a best-selling author. Can you imagine the amount of fame and credibility you'll get?

One of the primary reasons for all great success stories is the concept of continuous improvement.

You need to know how to double, triple and even quadruple the results you are getting. Become a never-ending improvement machine. Always think of and learn ways to do things better and commit yourself to continuous and never-ending improvement.

Improve all areas of your life.

Improve the spiritual area. Do little things everyday to improve your relation with God and create peace in your life.

Improve the personal area. Become more. Improve your career. Do an excellent job even on small tasks.

Improve your finances. Save, Invest, and give out some to charity.

Improve the social area. Spend sometime with your family, friends, and spouse. Participate in charity work.

Improve the physical area. Exercise, eat healthy food, drink water and breathe fresh air.

My friend, small things DO make a difference. Continuous improvement is the key to long term success.

Remember the old saying: "If you always do what you've always done, you'll always get what you've always got!"

If you want to see change in your life--big results--the first thing you must do is change your current actions. Always improve, don't stop or settle for the less.

Improve everyday and your future will take care of itself.

## STAND UP FOR YOUR DREAMS

When you were a child you dared to dream of anything. Nothing was impossible. It doesn't matter whether you had big dreams, small dreams or crazy dreams. What matters most is that you had the POWER TO DREAM.

Look how you are now. Do you still have the power to dream?  
Have your dreams died?  
Are you playing it safe?

Do you compromise your happiness and accept being among average people who know neither victory nor defeat? Are you living with people who live in the gray light?

\*\*\* Here is the fact: ALL SUCCESSFUL PEOPLE ARE BIG DREAMERS.

To succeed in life you MUST have a dream. You can't live without a purpose that gives your life meaning and joy.

Let me tell you the TRUTH...  
You have to either DREAM or REGRET...Yes, regret!

Someday, you will lie on your deathbed looking back to your past. If you had no dreams you will regret your meaningless life and hope that you can be given the chance to live your life again to DREAM BIG.

Mohamed Ali once said, "The one without dreams is the one without wings".

Aim for the top. The world needs you.

What are your wildest dreams? Set aside sometime today and re-dream. Bring your dreams to life again.

Dream, set goals, develop a plan, and TAKE ACTION NOW.

Your life is waiting.

Remember, DREAM or REGRET. Which one are you going to choose?

My brother in humanity...

STAND UP FOR YOUR DREAMS.

STAND UP FOR YOUR GREATNESS.

STAND UP FOR YOUR LEGACY.

Do it now. Do it now. Do it now.

You've got it within yourself to create an amazing life.
